**Subject:** Rooms To Go-Seffner Pre-bid RFI#8-Cabinetry & Millworks

David,  
Please respond ASAP to the following questions:

A. **Cabinets:** (Follow Drawings and Specifications)

- 1- Box material - 3/4" plywood laminated or 3/4" Melamine / Doors?
- 2- Interior of Boxes Laminated with either material?
- 3- Drawer Material - 1/2" plywood laminated both sides or 1/2" melamine?
- 4- Drawers Laminated with either material?

B. **Hardware:**

- 1- Stanley #SP41 - showed as discontinued when searched. (Stanley #CD46 is acceptable)
- 2- Pulls specified is Mocket DP281A but spec on detail for drawers and door pulls spec SWP-640/5?

C. **Laminate Walls:**

- 1- Material for outside trim is not really the applicable application -Inpro trim #407A. (We have used this trim successfully on previous projects)
- 2- I am assuming this material would be for the ends as well or would the edge be laminated? (All exposed edges of the laminate panels are to receive this trim)

D. The below areas look to have cabinets / millwork but no elevations are indicated? Please

advise.

B170-Office (By Owner)

B161-Breakroom (Existing to remain)

B159-OCC Health (By Owner)

Thank You,

Billy Dentmon, President
